Ms. Rachel

April 7, 2025

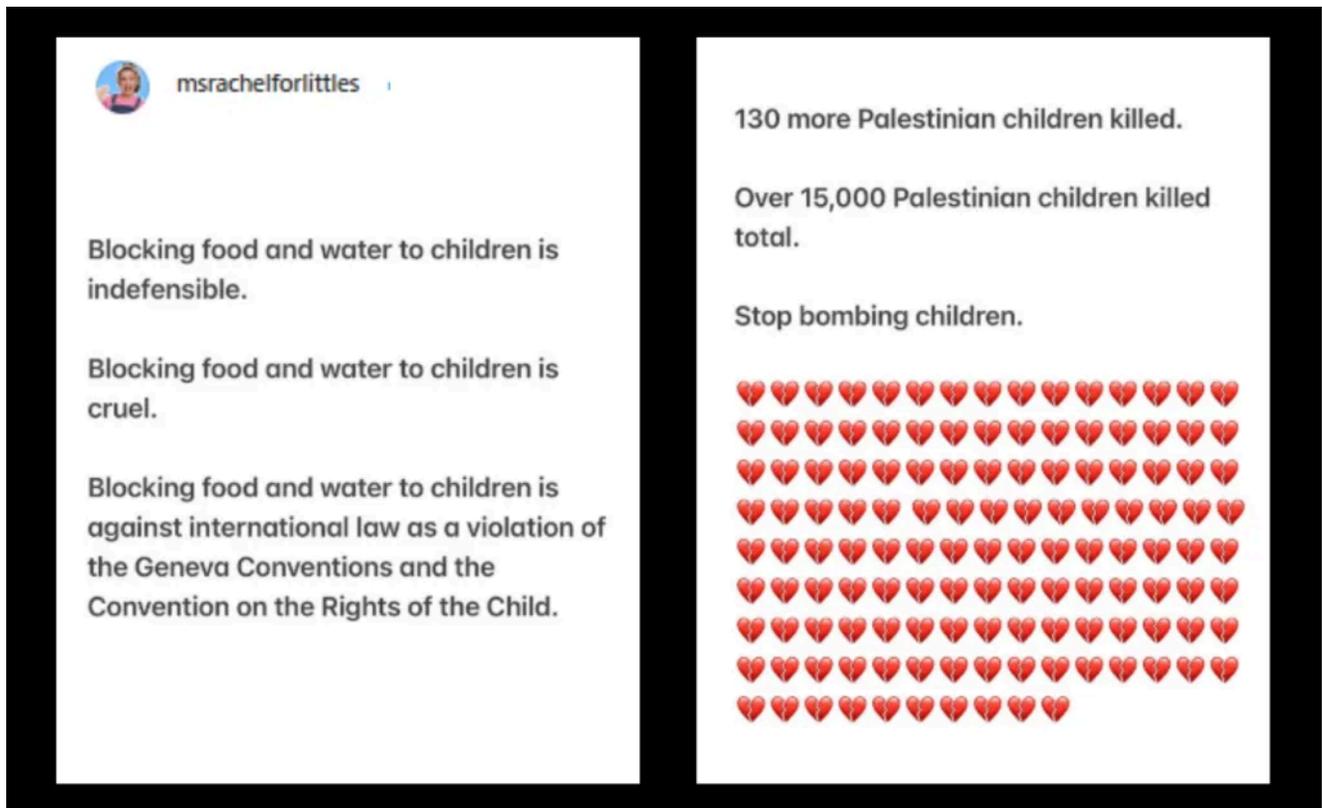

**REPORT
AN
INCIDENT**

urso, known by her stage name Ms. Rachel, became a household name with raising babies and toddlers. However, since her rise to fame, she appears to have transformed into a mouthpiece for Hamas. Now, she spreads vile propaganda against the Jewish state to over 20 million followers across multiple accounts - outnumbering the entire global population of Israelis and Jews.

Miss Rachel, no stranger to [controversy](#), had previously dabbled in politics but, after facing [backlash](#), quickly refocused on her brand and catering to children - until October 7, 2023. After the 10/7 massacre, she quickly began incorporating Hamas-propagated images and stories into her content.

For months, she ignored Israeli hostages and Jewish children impacted by the attack. This became evident when she quickly [raised \\$50,000 through Cameo for Gaza’s children](#) - without a single [mention](#) of Jewish victims. When the double standard was brought to light, she responded with a [video](#) singing about praying for children in Gaza and Israel. Her prayers were short-lived. Soon after, she resumed pushing Hamas statistics while continuing to ignore Israeli suffering.

Ms. Rachel has a long list of offenses driven by Hamas or UNRWA data rather than credible sources, including:

- Claiming to have seen **photos** of starving children with protruding limbs. However, these were quickly **debunked** as a misrepresentation of a child with cystic fibrosis,

**REPORT

INCIDENT**

ly used to accuse Israel of starvation tactics.

sistently sharing the **claim** that 14,000–15,000 children have been murdered in Gaza since 10/7. These figures come from the Hamas Health Ministry, which was also **debunked** when it admitted over 72% of those killed were combat-aged men, not women or children.

- Spreading false reports of Palestinian children dying from **hypothermia** in December. The widely **circulated photos** were actually taken from Wikipedia, not Gaza, and at the time, temperatures in Gaza were in the 70s. Ms. Rachel condemned these “deaths,” once again citing Hamas and Al Jazeera propaganda.
- Amplifying unverified **claims** that Israel was indiscriminately bombing and killing hundreds of children. These headlines quietly disappeared this week when Hamas failed to provide proof, and they coincided with Palestinian protests against Hamas. Instead of questioning the source, Ms. Rachel took to Instagram to demand Israel stop “bombing children.”
- Falsely accusing Israel of **violating the Geneva Convention** by halting aid when Hamas broke the ceasefire. Since 10/7 and until Hamas refused to release remaining hostages, Israel had **overseen the transfer** of 1.7 million tons of aid into Gaza on nearly 100,000 trucks.

The reality? Israel takes extensive measures to minimize civilian casualties. Hamas starves Gazans by hoarding aid, blocking access, and even shooting civilians who try to reach supplies. Aid sits rotting in Hamas tunnels while propaganda blames Israel. If anyone is starving, the blame lies solely on Hamas. its rotting in Hamas tunnels while propaganda blames Israel. If anyone is starving, the blame lies solely on Hamas.

In total, Ms. Rachel posted nearly 50 times about the children of Gaza, most of which is filled with misinformation from Hamas, and only 5 times about Israeli children. In the case of the Israeli children, she only posted due to widespread public backlash, never condemning Hamas and the Palestinians responsible for murdering Israeli children on 10/7 or the Bibas children in captivity.

With these statistics, one has to be concerned with who is funding these posts or encouraging Ms. Rachel to spread such vile propaganda.
